Type comments in the box at the bottom of this form. Email form to hallinen@yahoo.com Or click the submit form button

Click locations where invasive plant were treated

Open a second form if more than one plant species was treated.

60 degrees, sprayed garlic mustard that was growing quickly. Stuff I sprayed a few weeks ago is dead. Fresh leaves are popping above the leaf litter. Resprayed vinca that didn't seem to look sick at all. Will need hand pulling this spring. Sprayed a few asian bittersweet.
